Mr. Gabe Dayley introduced himself and made a [presentation on the county program](#).

Mr. Nick Garber expressed the need for coordination between the city and county. He observed from the presentations the trend lines for the city and county were similar and wondered had there been thought if one jurisdiction met goals and the other jurisdiction did not. Ms. Elliott and Mr. Dayley agreed and provided information on current coordination efforts.

In response to a question raised by Ms. Elliott, Mr. Kondor referenced traffic congestion on Rt29/Greenbrier Drive to US250, and his proposal that he thought would reduce the current 5-minute travel time (longer during peak hours) through that section down to about one minute. He stated reducing traffic congestion (improving traffic flow; time a car is spent running) was important in reducing greenhouse gas emissions.

Mr. Ethan Heil expressed comments regarding connectivity with bicycle and pedestrian facilities and if there were ways to measure that. Ms. Elliott referenced various scoring tools for bicycle and pedestrian areas and explained. Mr. Dayley referenced the TJPDC Bicycle and Pedestrian Plan, and Ms. Sandy Shackelford expounded. Mr. Chuck Proctor referenced comments regarding OneMap and its possible utility in the future.

Mr. Karim Habbab asked if there were efforts made by the city and county to use renewable energy instead of natural gas; he read an article recently on a new solar panel development to occur in the county. Mr. Dayley stated possible related objectives for consideration during the update of the county comprehensive plan and he referenced county projects. Ms. Elliott explained the relationship between immediate investments and one time cost solutions, versus gradual change and fuel supply and technology markets over the course of time.

Mr. Marty Meth stated walking and biking may not be a wise investment with limited resources, though he liked walking; he wondered if public transportation should be the focus in the county. Mr. Dayley explained. Mr. Meth also asked about the greenhouse gas emissions charts in the presentation and asked about when the curve would be. Mr. Dayley and Ms. Elliott explained.
