1. CALL TO ORDER (MINUTE 0:48)

The MPO Policy Board Chair, Mr. Brian Pinkston, presided and called the meeting to order at 4:01 p.m. Sandy Shackelford called roll.

2. MATTERS FROM THE PUBLIC (MINUTE 1:20)

a. Comments by the Public: Paul Grady, resident outside of Crozet, spoke about a Smart Scale project (widening of the 250 bypass from four to six lanes and the replacement of the numerous bridges) that did not get funded. He said the project, the 250 interchange is where 25% of the traffic got on and off the road and only 75% of the traffic went under the bridges which means the bridges don't need replacement yet, but the 250 bypass still needs to be six lanes. He said he had made suggestions in the past for the on and off ramps for UVA and Barracks Road and that didn't happen. He said that Alice Raucher, from UVA, said some years ago that UVA would really like an interchange at Leonard Sandridge Road with the 250 bypass but they did not have the money to make that happen. He suggested that it would make a good revenue sharing project between UVA, Albemarle County, and VDOT.

City of Charlottesville

Albemarle County

Fluvanna County

Greene County

Louisa Cou

Nelson County

b. Comments provided via email, online, web site, etc.: None.

Mr. Pinkston invited Daniel Wagner to introduce himself to the committee as the newest member.

3. GENERAL ADMINISTRATION* (MINUTE 5:08)

Review and Acceptance of the Agenda

Motion/Action: Ann Mallek made a motion to approve the agenda as amended, Ned Gallaway seconded the motion and the motion passed unanimously.

Approval of the August 23, 2023 Meeting Minutes

Motion/Action: Ann Mallek made a motion to approve the minutes. Ned Gallaway seconded the motion and the motion passed unanimously with Lloyd Snook abstaining.

Approval of the September 27, 2023 Meeting Minutes

Motion/Action: Ann Mallek made a motion to approve the minutes. Ned Gallaway seconded the motion and the motion passed unanimously.

4. MOVING TOWARD 2050 PLAN UPDATE (MINUTE 6:40)

Sandy Shackelford presented the committee on the update for the Moving Toward 2050 plan. She gave a background of the engagement process & goals. She continued by highlighting the level of effort to get public engagement to date which resulted in engagement with nearly 600 participants, and a breakdown of the total comments received.

She continued by breaking down further the MetroQuest community survey results, including scoring priorities trade offs, interactive map, and demographics.

Ms. Shackelford said staff created an online map showing the locations of candidate transportation projects pulled from various plan documents and studies from throughout the region. She presented the map showing an overview of candidate projects in the region.

Ms. Shackelford noted that the overarching themes from this phase of the public engagement effort include a need for safer roadways and intersections, dedicated and protected bicycle and pedestrian infrastructure, and an enhanced public transit system. She noted that the community appears to be eager for solutions that prioritize safety and accessibility over traditional car-centric designs.

She continued by sharing that it will be important to determine the weighing of each of the evaluation metrics that will be used to prioritize the transportation system needs. She continued by presenting the prioritization categories.

There was discussion about how best to weigh the metrics.

5. REGIONAL TRANSIT GOVERNANCE STUDY (MINUTE 45:33)

Lucinda Shannon shared that the Regional Transit Governance Study is heading into Phase IV, Governance Options. She said the steering committee discussed board membership, the role in transit planning and decision making, indicators of accountability, the current state of transit funding, and the regional vision plan operating cost estimates.

She said there was a discussion with the steering committee about local funding options, including estimated revenues from additional sources from sales, lodging, personal property tax, and real estate taxes. There was some conversation about those cost estimates/taxes and how the information will be presented to the affected jurisdictions.

6. SOCIOECONOMIC DATA FOR TRAVEL DEMAND MODEL (TDM) (MINUTE 1:02:40)

Ms. Shackelford presented the committee with an overview of why the MPO needs this information and why action is needed by the committee. She also gave an explanation of a Traffic Analysis Zone (TAZ).

She noted that the MPO is required to maintain and use the model in its long-range transportation plan and said needs formal action by the Policy Board to approve the use of the data as presented.

Ms. Shackelford said there is a new model that will be implemented in the future, but it will not be available in time for this long range plan.

Motion/Action: Ned Gallaway made a motion to approve the use of the data as presented by staff. Sean Nelson seconded the motion and it passed unanimously.

7. **SMART SCALE (MINUTE 1:13:49)**

Ms. Shackelford presented a summary of the discussions at the September and October Commonwealth Transportation Board (CTB) meetings. The first summary was about the application caps based on population.

She continued by covering the definition of "high priority project" (HPP). She said "Transit Transfer Station" and "New Bridge" were added at the September meeting for consistency with economic development project tiering considerations. She covered the potential eligibility of MPO projects under the revised HPP definition.

Ms. Shackelford asked if there was consensus to move forward on the Diverging Diamond Intersection at exit 120, and after some discussion, consensus was reached to study the project for potential inclusion.

Ms. Shackelford reviewed how the current economic development methodology is evaluated through Smart Scale and then discussed how the CTB is considering changing the evaluation process.

Ms. Shackelford provided the committee with the MPO Technical Advisory Committee feedback,

She continued by giving a summary of the CTB discussion.

Ms. Shackelford presented the land use scoring factor re-allocation considerations, and shared how the re-allocations would have impacted Round 5 projects.

She presented potential feedback the CA-MPO Policy Board could provide to the CTB and there was a discussion about what else might be added or amended. It was noted that the only consensus on feedback that there was support for increasing the application caps as presented in the revised staff recommendation.

8. STAFF UPDATES (MINUTE 1:52:12)

Safe Streets & Roads for All Grant

Curtis Scarpignato briefly reviewed the grant and gave information on the current status. He noted that Kimly Horn is the consultant on this project with the MPO.

9. ROUNDTABLE DISCUSSION (MINUTE 1:54:49)

Ben Chambers, Charlottesville, and Jessica Hersch-Ballering, Albemarle County, and Michael Barnes and Sean Nelson, VDOT, gave brief updates.

Brian Pinkston had to leave the meeting because he had a City Council meeting at 6:00 p.m. Ann Mallek took over as Chair.

10. ADDITIONAL MATTERS FROM THE PUBLIC

None.

The next meeting with be on December 11 at 10:00 a.m.

Committee materials and meeting recording may be found at https://campo.tjpdc.org/committees/policy-board/

Regional Transit Governance Study

Draft Executive Summary

Study Overview

Over the past several years, the Thomas Jefferson Planning District Commission (TJPDC) has worked collaboratively with its member jurisdictions to improve transit service in the region. In the past year, the region undertook a collaborative effort to develop a <u>Transit Vision Plan</u> to establish a clear, long-term vision for efficient, equitable and effective transit service for the region. Led by the TJPDC and supported by the City of Charlottesville, Albemarle County, and DRPT, the Transit Vision Plan established a unified vision for transit service in Region 10, which is made up of the counties of Albemarle, Fluvanna, Greene, Louisa, Nelson, and the City of Charlottesville.

This governance study is a follow-up study that seeks to identify governance options for regional transit and increase transportation investments in the region. The study's focus identifies options for a governance body that can steward additional transit revenues generated; the scope does not include strategies or approaches for consolidating current transit operations.

Study Goals and Approach

The two main goals of this study are to:

- 1. Identify strategies for dedicated transit funding to augment current jurisdictional costs for transit.
- Identify a governing structure that can manage and account for the use of the additional transit funds, better capture and allocate the full costs of service, and ensure transparency.

The additional funds will support the implementation of the services in the Transit Vision Plan and increase transit services across the region.

To achieve these goals, the study team adopted a five-phase approach shown in Figure E-1.

Phase 1: Existing Conditions

- Review of existing Transit operators in region
- Comparative legislative anlaysis of Charlottesville-Albemarle RTA

Phase II: Peer Study of Regional Transit Governance

- Review case studies of transit governance structures
- Identify governance lessons and strategies for Charlottesville Region

Phase III: Potential Revenue Generation

- Identify potential transit funding mechanisms
- Estimate the associated funding yields from the feasible sources identified
- Develop revenue models with five-year projections based on estimated Transit

Phase IV: Develop Governance Scenarios & Funding Allocations

- Identify options for transit governance and funding
- Facilitate consensus on prefered alternative

Phase V: Evaluate and Recommend Governance Structures

Evaluate and document final governance alternatives

Figure E- 1 Study Approach

A steering committee was formed to guide the study and provide feedback. It comprised representatives from Albemarle, Fluvanna, Louisa, Nelson, and Greene counties, the City of Charlottesville, TJPDC, Virginia Department of Rail and Public Transportation (VDRPT), and University of Virginia (UVA). Additionally, stakeholder engagement was also conducted with the transit providers, Regional Transit Partnership, the TJPDC Commission, boards of supervisors of member counties, Charlottesville City Council, the Metropolitan Planning Organization Policy Board, and the Virginia Department of Transportation (VDOT).

Existing Legislation for a Regional Transit Authority

The legislature provided for the Charlottesville-Albemarle Regional Transit Authority (CARTA) as early as 2009 with subsequent amendments. The authority was established as a service delivery organization, with the contracting, financial (including bonding), and acquisition and operating powers necessary. Its authority is for transit. Charlottesville and "all or portions of Albemarle County" are the essential boundaries, but additional portions of Albemarle, Fluvanna, Greene, Louisa, and Nelson counties as well as cities, towns, tourist-driven and public transit agencies, and higher education agencies may join as members. There is no provision in the current CARTA legislation for dedicated funding, which would come from federal, commonwealth, or local sources.

Frameworks for Regional Transit Governance

Other frameworks exist for regional transit governance. A peer review of six agencies with similar demographic, geographic, and operating characteristics to the Charlottesville Region showed various governance structures including transit service provided by a *town department* with funding from a university (Blacksburg Transit); *public transportation corporation* funded through local property and income taxes (Bloomington Transit); a *joint municipal authority* funded by member municipalities (CATA); *501 (c)(3) nonprofit* funded through general fund contributions from a city, county, and university (TCAT, Ithaca); and a *transportation authority* (TheRide, Ann Arbor) and city department (ICT, Iowa City) both funded through local property taxes.

Recommended Governance Structure

With the exception of funding authority, the existing CARTA legislation possesses the fundamental structure and make-up of a regional transit authority that could serve Region 10. It is recommended for regional stakeholders to implement the existing structure in the interim while an *ideal* transit authority that has potential to accomplish regional goals is pursued.

The following describes the ideal transit authority for the region. These characteristics were derived from a comparative review of other Virginia Regional Transit Authorities (RTAs)¹ and regional peers, and consensus building discussions with regional stakeholders.

- Creation: The authority may be created by issuing new state legislation or modifying existing² legislation to form a transit authority that meets the characteristics described. Existing legislation for the Charlottesville-Albemarle Regional Transit Authority (CARTA) may be amended to include funding and align with other sections described in this section.
- **Purpose:** The authority would serve as a regional decision-making body for transit matters. Its purpose would be to plan for regional transit service and to manage any dedicated transit funding generated in the region.
- Authority participation: The authority may be created with the City of Charlottesville and Albemarle County as initial
 members, and an option for the counties of Fluvanna, Greene, Louisa, and Nelson to join as participating members as
 well.
- Other Entities as Participants: Other entities such as higher education institutions, public transportation agencies, or private nonprofit entities may also join the authority upon agreement, concurrent resolution, or ordinance of the existing members of the authority.
- Board Composition: The board composition will be:
 - Two directors representing the County of Albemarle, each of whom shall be a member of the governing body of the county.
 - Two directors representing the City of Charlottesville, each of whom shall be a member of the governing body of the city.
 - One director representing each county that joins the Authority, each of whom shall be a member of the governing body of each respective county.³

¹ Hampton Roads Transportation Accountability Commission (HRATC), Central Virginia Transportation Authority (CVTA), and Northern Virginia

² Charlottesville-Albemarle Regional Transit Authority https://law.lis.virginia.gov/vacode/title33.2/chapter28/

³ There are mechanisms available to ensure that funding raised by a jurisdiction are invested back into that jurisdiction.

Regional Transit Governance Study Executive Summary of the Draft Final Report December 5, 2023

The Board may also include gubernatorial appointees and representatives from state or regional bodies such as DRPT, the House of Delegates, the Senate, or any other body deemed appropriate by the state legislature. Additional directors may also be added to represent the interests of any agencies or institutions that join the authority.

Most authorities have the option for the board structure to change as needed to reflect changes in the region that occur over time. Rules for change may include transit service-based methods or population-based methods. Boards should ideally represent all taxpayers (including non-transit riding taxpayers), therefore, a combination of the two approaches could be considered if modifications are required.

Potential Transit Funding Options

Two transit network alternatives were developed as part of the Transit Vision Study. Operating costs for the two alternatives were estimated at roughly \$35.5 million and \$85 million per year⁴ for the constrained network and unconstrained network respectively. The constrained vision network was developed under the premise of a future regional transit authority with the ability to generate additional revenue. Both options provide a drastic improvement to current transit service across the region including increased routes, frequencies, and days of service for the urban areas; and micro transit options and all-day service, seven days a week into the city from the lower density areas. Detailed descriptions of the transit service improvements can be found in the study report.

Public transportation is funded through a combination of federal, state, local, and internally generated sources (e.g., fares, advertising, etc.). Average operating costs per year for current transit service in the region (not including UTS) is approximately \$18 million per year with the local component making up about a third (~\$5 million⁵ in 2021) of the total amount. A substantial increase in local funding is required to meet the funding gap between current transit funding and the future funding needed for increased transit service across the region.

After extensive research of potential revenue sources and stakeholder engagement, the following options were determined to be most feasible 6 under the Virginia context: Sales tax: A tax on the sale of goods or services purchased (not including tax for non-prepared foods). It is the most common source for funding local and regional transit services. Being relatively stable and having moderate public acceptance, an additional 0.7% increase in sales tax across the region could generate an approximate five-year average of \$37 million per year.

- Transient occupancy tax/lodging tax: A tax on lodging establishments and does not directly impact residents. It
 has a minimal revenue yield in some areas. An additional 0.5% could generate an approximate five-year average
 of \$1 million per year.
- Personal property tax: A tax on the value of all motor vehicles, trailers, mobile homes, boats, and aircrafts. It is a relatively stable source but has potential for public resistance if the rate of increase is significant. An additional 0.5% could generate an approximate five-year average of \$13 million per year.
- Real estate tax: A tax on the assessed value land and buildings. It is widely used to finance transit and typically considered a default funding source. An additional 0.1% could generate an approximate five-year average of \$52 million per year.

Although funding estimates were developed for the four revenue sources above, representatives from member localities expressed flexibility in pursuing funding sources. As efforts are made toward implementation, member localities are open to adopting one sole source, a combination of sources, or alternative options not identified in this study. Detailed estimates may be found in Section 4: Revenue Generation.

⁴ When anticipated state and federal funding are accounted for, the local component of these amounts are estimated to be between 54 percent and 65 percent of the total respective amounts. Total cost estimates do not include costs associated with capital investments and ADA paratransit service requirements for fixed route expansions.

⁵ National Transit Database (2021).

⁶ Analysis was conducted assuming a uniform levy across all Region 10 localities.

Recommended Next Steps

The following next steps are recommended as a result of feedback from this study.

- Use the CARTA structure to establish an interim entity for regional transit governance and decision making (while legislative action is being pursued) with authority to plan for transit service and with the ability to expand its role over time.
- Conduct a transit needs assessment that clearly analyzes rural transit needs and estimated service costs.
- Ensure continued rural engagement in development of legislative packet for a regional transit authority. Include protective mechanisms in the use of transit revenue generated to lead to equitable investments across the region. Continue educational efforts on the potential benefits of a regional authority and its impact on different types of residents.
- Engage UVA leadership at a level where there is decision-making authority in subsequent efforts toward establishing a transit authority.

The scope of this study does not cover identification of transit service improvements, consolidation of existing transit operations, and administration/governance of school bus operations.

Recommendations presented at the conclusion of this study do not require any immediate action beyond consensus and good faith efforts to participate and support the groundwork needed for implementation.

Memorandum

To: MPO Committees

From: Sandy Shackelford, Director of Planning & Transportation

Date: November 29, 2023

Reference: Moving Toward 2050 Travel Demand Model Outputs

Purpose:

The travel demand model for the region is maintained by VDOT in collaboration with the MPO. Regions with an existing Travel Demand Model are required to reference their models in the development of their long range transportation plans.

The Travel Demand Model provides information on existing and projected network congestion based on estimated growth rates throughout the region. The growth projections for use in the Travel Demand Model were approved by the Policy Board at their meeting in October.

Discussion:

Using the baseline and future growth socio-economic data that was approved at the previously Policy Board meeting, VDOT modeling staff ran the baseline and future no-build scenarios to demonstrate estimated volume over capacity ratios throughout the network based on anticipated growth. The future no-build scenario incorporates committed transportation improvements that have been awarded funding but have not yet been built.

To ensure an accurate comparison of system conditions between the baseline conditions and the future conditions, staff used the ranges of volume over capacity ratios that correlated to established Level of Service summarized in the table below to develop the system maps:

Level of Service	V/C
Α	0.35
В	0.55
С	0.77
D	0.92
E	1.0
F	>1.0

Once the MPO begins to narrow down potential projects to include in the fiscally-constrained priority list, the model will demonstrate how the potential projects may impact overall future system conditions.

The maps can be viewed here: <u>Travel Demand Model Outputs</u>

Actions: This information is being shared for discussion purposes. No action is requested at this time.

Charlottesville-Albemarle Metropolitan Planning Organization

POB 1505, 401 E. Water St, Charlottesville, VA 22902 www.tjpdc.org (434) 979-7310 phone • info@tjpdc.org email

Memorandum

To: MPO Committees

From: Sandy Shackelford, Director of Planning & Transportation

Date: November 29, 2023

Reference: Moving Toward 2050 Data Analysis Updates

Purpose:

The MPO worked with a consultant team of Michael Baker and Renaissance to develop a process to prioritize transportation improvements within the MPO area. MPO staff and the EPR consultant team have been working through the prioritization of system needs.

Discussion:

The attached table shows the current status of the data processing as of the date of this memo. As data processing is completed, staff will continue to make the outputs available in a shared folder for review with the caveat that the individual data layers will paint an incomplete picture of the overall system needs. The needs prioritization will be based on the cumulative weighting from all of the evaluation criteria to demonstrate where the highest priority system needs are. However, review of the individual evaluation metric outputs is a good opportunity to ensure the data outputs are reasonable and make sense.

It is also important to reiterate that this data analysis is only one aspect of identifying system network needs. This data will be considered in conjunction with the public input that was provided as part of the public outreach that was conducted earlier this year.

Staff is continuing to work to complete the data processing and begin reviewing the system needs and public input against the candidate project list to begin identifying the project priorities. This analysis will be used to develop an initial list of project priorities. Ultimately, this list will be determined by the Policy Board based on additional public feedback and recommendations from the MPO committees.

Maps of the data analysis completed to date can be found here: <u>Data Prioritization Maps</u>

Actions: This information is being shared for discussion purposes. No action is requested at this time.

Charlottesville-Albemarle Metropolitan Planning Organization

POB 1505, 401 E. Water St, Charlottesville, VA 22902 www.tjpdc.org (434) 979-7310 phone • info@tjpdc.org email

Table 1. Summary of Needs Prioritization Processing Completed

Prioritization Category	Evaluation Metric	Threshold	Factor Weighting	Data Processing
Safety	Roadway Safety (PSI ¹)	All PSI locations	15%	In Progress
•	Bike/Ped Safety (PSAP ² Corridors)	Top 5% Regional Corridors ³	15%	Complete
Multi-modal Accessibility	PAI ⁴ - Bike/Ped	All segments PAI greater than 0	8%	Complete
·	PAI - Transit	All segments PAI greater than 0	8%	Complete
	PAI - Vehicle	All segments PAI greater than 0	6%	Complete
	PAI – Disadvantaged Populations	All segments PAI greater than 0	8%	Complete
Efficiency & Economic Development	Travel Time Index	Avg weeklong TTI > 1.5 for three hours; > 1.7 for one hour	3%	Not yet started
	Travel Time Reliability (PTI ⁵)	Avg weeklong PTI > 1.5 for three hours; > 1.7 for one hour	3%	Not yet started
	Transit On-Time Performance	On-time performance less than systemwide average performance from previous year	4%	Not yet started
Land Use Coordination	Walk Access - General	All segments in "somewhat walkable" census tracts	10%	Not yet started
	Walk Access – Disadvantaged Populations	All segments in transit viable EEA ⁶ that are also in "somewhat walkable" census tracts	20%	Not yet started
Environment	Flooding Exposure	Segments Exposed to Historical Flooding Additional Adjustment for economically distressed communities		

¹ PSI – Potential for Safety Improvement

² PSAP – Pedestrian Safety Action Plan

³ While the MPO committees had supported the use of the top 5% of the statewide corridors for this evaluation metric, the information contained in that data layer was not compatible with the processing steps to utilize the information. The information glitch in the mapping layer that prevented us from viewing the correct information when the MPO committees were discussing the information had been resolved. While the top 5% regional corridor contains additional segments on smaller road networks than what is considered in the Top 5% of statewide corridors, the use of the top 1% regional corridors did not include all of the segments that were captured by the top 5% statewide corridors. Therefore, MPO staff used the top 5% regional corridors data layer to complete the first step of the data processing.

⁴ PAI – Potential for Accessibility Improvement

⁵ PTI – Planning Time Index

⁶ EEA – Equity Emphasis Areas; defined in <u>VTrans</u>

Glossary of Terms

NHPP: National Highway Performance Program

Provides support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

IM/NH: Interstate Maintenance/National Highway System

Provides funding for resurfacing, restoration, rehabilitation and reconstruction (4R) work, including added lanes to increase capacity, on most existing Interstate System routes.

STP: Surface Transportation Program

Provides flexible funding that may be used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals.

EB/MG: Equity Bonus/Minimum Guarantee

Provides funding to States based on equity considerations. These include a minimum rate of return on contributions to the Highway Account of the Highway Trust Fund, and a minimum increase relative to the average dollar amount of apportionments under TEA-21. Selected States are guaranteed a share of apportionments and High Priority Projects not less than the State's average annual share under TEA-21. This program replaces TEA-21's Minimum Guarantee program.

CMAQ: Congestion Mitigation and Air Quality

Provides a flexible funding source to State and local governments for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards for ozone, carbon monoxide, or particulate matter (nonattainment areas) and for former nonattainment areas that are now in compliance (maintenance areas).

BROS: Bridge Off-System

Provides funding to enable States to improve the condition of their highway bridges through replacement, rehabilitation, and systematic preventive maintenance.

DEMO: Demonstration

Provides funding for the adoption of innovations and technologies, thereby improving highway safety and quality while reducing congestion caused by construction.

SAFE: Safety Funding or Highway Safety Improvement Program

Provides funding to achieve a significant reduction in traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on tribal lands.

ARRA: American Recovery and Reinvestment Act

Provides funding to a wide variety of transportation programs, including roads, bridges, rail, buses and airport improvements.

Description

The Annual Listing of Obligated Projects (Annual Listing) includes all projects and strategies listed in the Transportation Improvement Program (TIP) for which federal funds were obligated during the immediately preceding program year. The Annual Listing is intended to improve the transparency of transportation spending decisions by providing an accounting for federal funds that have been authorized and committed by the state or designated recipients (e.g. CAT Transit System) for expenditure on projects programmed in the TIP.

The tables on the following pages describe the projects included in the TIP, identify the responsible agency, the amount of federal funds requested/obligated, and the amount of funds remaining to be obligated on the project. A "guide sheet" precedes the Annual Listing for all roadway projects in the Charlottesville-Albemarle MPO that received federal obligations. At the end of this report there is a table that outlines all FFY19 federal obligations for transit systems within the MPO. Should there be any questions regarding the report, please contact the MPO staff at (434) 979-7310 or info@tjpdc.org.

Definitions of Interest

- Program Year: the year in which project obligations are reported; for purposes of this report, the program year is the federal fiscal year from October 1, 2022 through September 30, 2023. Both the roadway obligations and the transit obligations are organized by the federal program year.
- Obligation: An obligation is the federal government's legal commitment to pay the federal share of a project's cost. An obligated project is one that has been authorized by the federal agency and for which funds have been committed. Projects for which funds have been obligated are not necessarily initiated or completed during the program year, and the amount of the obligation will not necessarily equal the total cost of the project. For projects under the auspices of the Federal Transit Administration (FTA), obligation occurs when the FTA grant is awarded. For projects under the auspices of the Federal Highway Administration (FHWA), obligation occurs when a project agreement is executed and the state/grantee requests that the funds be obligated.

Overview of FFY23

FHWA

- Interstate Projects: There were no identified interstate projects in FFY23
- Primary Projects: There were no identified Primary projects in FFY23
- Urban Projects: There were 4 projects with an obligation in FFY23
- Secondary Projects: There were no federal obligations for secondary projects in FFY23
- Miscellaneous: There were no identified miscellaneous items in FFY23
- Public Transportation: There were no identified public transit projects from FHWA in FFY23
- Rail: There were no identified rail projects in FFY23
- Enhancement: There were no identified enhancement projects in FFY23
- <u>Grouping</u>: There were several federal obligations for these various projects. Project groupings include projects that are not considered to be of an appropriate scale to be called-out individually in the TIP. They are grouped by project function, work type, and/or geographic area.

FTA

- Charlottesville Area Transit: Obligations for CAT projects are indicated at the back of this document. The biggest obligations were for the:
 - o Governor's Apportionment
 - o Engineering and Design of Admin. Facility
- JAUNT: The biggest obligations related to JAUNT service were:
 - Operating Management
